Young, Donald R. 298

Subject Index

A

α-amylases, Zea mays 395
Abscisic acid, Ceratopteris richardii 522
Acid rain, effects, simulated 134
Agathis, cuticle micromorphology 187
Age structure, geophyte population 441
Agrobacterium rhizogenes, anatomy of roots induced by 59
Aleuria, ascospore ontogeny 334
Aloe, DNA variations 169
Alstroemeria pelegrina, cytogenetics 565
Amyema preissii, haustorial development 386
Anatomy, Ephedra viridis primary shoot 264
Andropogon gerardii, response to elevated CO_2 459
Annual ring anatomy, Thuja occidentalis 406
Antheridiogen, Ceratopteris 522
Architecture, sectored radial 496
Ascospore ontogeny 334
Astragalus cicer, cytogenetics 450
Auxin, control of vascular tissue differentiation 229

B

Banksia spinulosa, reproductive biology 306
Besseya, phylogenetic analysis 350
Botrychium jenmanii, axenic culture 68

C

C_4 grass, response to elevated CO_2 459
Cambial dieback, Thuja occidentalis 496
Castanopsis fargesii, architecture and light 481
Cell enlargement, solute uptake, hydraulic conductance 10
Cell lineage 367
Cell wall rigidity, response to dehydrative stress 90
Cell wall ultrastructure 1
Ceratocapnos heterocarpa, reproductive biology 280
Ceratopteris richardii, programming of sexual phenotype 522
Chasmogamy, Ceratocapnos heterocarpa 280
Chromosomal addition, phenotypic plasticity 473
Cladistic analysis, Besseya 350
Cleistogamy, Ceratocapnos heterocarpa 280
Cliff ecology, Thuja occidentalis 496
CO_2, elevated 459
CO_2 recycling during CAM 100
Cordaitales 572
Cordaixylon dumusum 572
Crassulacean acid metabolism, Tillandsia 100
Cryptic dioecy, Rosa setigera 550
Cuticle micromorphology, Agathis 187
Cytogenetics: Alstroemeria pelegrina 565; Astragalus cicer 450
Cytophotometry, Aloe DNA content 169

D

Development: Agrobacterium rhizogenes–induced roots 59; Artemisia annua glandular trichomes 107; Botrychium jenmanii 68; gibberellin 280; heat-shock proteins 290; mistletoe haustoria 386; shoot bud histogenesis 378; stelar architecture 225, 229; stomatal patterning 367; Teloschistes flavicans 75; Vicia faba 80, 535
Dioecy: cryptic 550; Silene latifolia 152
DNA variation, Aloe 169
DNA:DNA hybridization, Lathyrus spp. 163

E

Early Devonian gametophytes 35
Ecology: Banksia spinulosa fruit set 306; Castanopsis fargesii seedlings 481; Ceratocapnos heterocarpa cleistogamy and chasmogamy 325; Chionographis japonica spatial autocorrelation 467; Cordaixylon dumusum 572; Eucalyptus leucoxylon gynodioecy and male sterility 314; grass/endophyte mutualism 134; Haemanthus pubescens life history 441; phenotypic plasticity 473; Rosa setigera cryptic dioecy 550; Silene latifolia sexual dimorphism 152; Thuja occidentalis 496
Ecophysiology: Gutierrezia sarothrae 144; leaf spectral reflectance 298; response to elevated CO_2 459; rhizosphere water relations 425
Elytrigia, chromosomal addition 473
Embryogenesis, Vicia faba 80, 535
Endophyte/grass mutualism 134
Ephedra viridis, structure of the primary shoot 264
Eucalyptus leucoxylon, reproductive biology 314
Evolution: early land plants 35; stelar architecture 223, 229

F

Floral morphology: Rosa setigera 550; Ruppia occidentalis 416
Florets, Phragmites australis, vasculature 119
Flower lifespan, Portulaca umbraticola 412
Forbs, response to selective herbivory 432
Fruit set, nonrandom patterns 306
Fynbos 441

G

Gametophyte: Botrychium jenmanii 68; early Devonian 35
Genetics of reaction norms 473
Geophyte, Haemanthus pubescens 441
Germination, α-amylases 395
Gibberellin 22, 280
Glandular trichome, Artemisia annua 107
Growth 1, 10, 22
Gutierrezia sarothrae, ecophysiology 144
Gymnosperm: axillary bud ontogeny 378; Cordaixylon dumusum 572; primary shoot structure 264
Gynodioecy: Chionographis japonica 467; Eucalyptus leucoxylon 314
Gynoecium, morphology and relationship to dioecy 550

H

Haemanthus pubescens ssp. pubescens 441
Heat-shock protein, Oryza sativa 290
Herbivory: effect on water relations 432; effect on wild and cultivated annual graminoids 557
Histogenesis: axillary bud 378; ovule 80
Hordeum vulgare, herbivory 557
Host specificity, mistletoe 386
Hydraulic conductance, Gutierrezia sarothrae 144

I

In organello protein synthesis 290
Inhibition and stomatal patterning 367
Interovary competition, Banksia spinulosa 306
Invertase, cell wall 280

L

Lathyrus, systematics 163
Leaf anatomy, Tillandsia 100
Leaf spectral reflectance 298
Lichen, Teloschistes flavicans morphology 75
Light environment, plant morphology response 481

Longevity, Thuja occidentalis 406, 496
Lysiana exocarpi, haustorial development 386

M

Male sterility, Eucalyptus leucoxylon 314
Malus pumila, anatomy of roots induced by Agrobacterium rhizogenes 59
Meiotic analysis: Astragalus cicer 450; Lathyrus hybrids 163
Mistletoe development 386
Modeling: evolution of stelar architecture 229; stomatal patterning 367
Molecular biology, affect of gibberellin on cell wall invertase 280
Morphology: Rosa setigera flowers 550; Ruppia flowers 416; Teloschistes flavicans 75
Mutant-based approach to plant growth 22
Mutualism, Festuca arundinacea/Acremonium coenophialum 134
Myrica cerifera, leaf spectral reflectance 298

N

Nutrient transport, Vicia faba ovule 80, 535

O

Octoploids, Astragalus cicer 450
Octospora, ascospore ontogeny 334
Opuntia ficus-indica, rhizosphere water relations 425
Oryza sativa, heat-shock proteins 290
Ovule, Vicia faba, nutrition 535

P

Paleobotany: Cordaixylon dumusum 572; Early Devonian gametophytes 35; evolution of stelar architecture 229
Pattern formation: stele 225, 229; stomata 367
Pezizales, ascospore ontogeny 334
Phenotypic plasticity 473
Photosynthate distribution to roots 425
Photosynthesis: Andropogon gerardii 459; Gutierrezia sarothrae 144
Phragmites australis, floret vasculature 119
Phylogenetic analysis, Besseya 350
Physiology: CO_2 recycling during CAM 100; Zea mays α-amylase isozyme profiles 395
Picea glauca, pollen germination 506
Pinus elliottii, leaf spectral reflectance 298
Pisum sativum, stem elongation 22, 280
Plant stress, leaf spectral reflectance 298
Plant-herbivore interaction 557
Pollen presentation, Eucalyptus leucoxylon 314
Pollen-tube growth, Picea glauca 506
Pollination: Cordaixylon dumusum 572; effect of self-pollination 412; Rosa setigera cryptic dioecy 550; Ruppia spp. 416
Population structure, spatial autocorrelation 467
Portulaca umbraticola, effect of self-pollination 412
Pulvinula, ascospore ontogeny 334
Pyroloideae, seed morphology 175

R

Reproduction: Banksia spinulosa fruit set 306; Botrychium jenmanii culture 68; Ceratocapnos heterocarpa, cleistogamy and chasmogamy 325; Ceratopteris richardii sexual programming 522; Cordaixylon dumusum 572; Eucalyptus leucoxyon male sterility 314; Picea glauca pollen tube growth 506; Portulaca umbraticola, self-pollination affects flower lifespan 412; Rosa setigera cryptic dioecy 550; Ruppia spp. 416; Vicia faba embryogenesis 80, 535
Rice mitochondria, heat-shock proteins 290
Root developmental anatomy, induced by Agrobacterium rhizogenes 59
Roots, relation to soil 425
Rosa setigera, cryptic dioecy 550
Ruppia spp., meristic variation 416

S

Seed morphology, Pyroloideae systematics 175
Setaria spp., herbivory 557
Sexual dimorphism, Silene latifolia 152
Sexual phenotype, programming 522
Shade tolerance, Castanopsis fargesii 481
Shoot bud formation, Thuja occidentalis 378
Shoot structure, primary, Ephedra viridis 264
Soil sheaths, rhizosphere water relations 425
Spatial autocorrelation, Chionographis japonica 467
Sporophyte, Botrychium jenmanii 68
Sporophyte generation, early land plant 35
Starch mobilization, α-amylases 395
Stele 225, 229
Stomatal patterning 367
Stress: dehydrative 90; effect of low resources on Silene latifolia 152; flag leaf defense, herbivory 557; measured by leaf spectral reflectance 298; response to elevated CO_2 459; selective herbivory 432
Structure: Castanopsis fargesii morphology in response to light environment 481; Chionographis japonica population structure of genotypes 467; Ephedra viridis primary shoot 264; Phragmites floret vascular system 119; Thuja occidentalis annual rings 406; Thuja occidentalis cliff ecology 496
Supercooling, freezing behavior 90
Surface expansion, cell wall 1
Systematics: Agathis 187; Aloe 169; Besseya 350; Lathyrus 163; Pezizales 334; Pyroloideae 175

T

Tallgrass prairie, selective herbivory 432
Teloschistes flavicans, morphology 75
Thuja occidentalis: cliff ecology 406, 496; shoot primordia formation 378
Tillandsia, CO_2 recycling during CAM 100
Trichome, glandular, Artemisia annua 107

U

Ultrastructure: Artemisia glandular trichome 107; ascospore ontogeny 334; cell wall texture 1; Picea glauca pollen tube 506; Vicia faba embryogenesis 535

V

Vascular differentiation, stelar architecture 225, 229
Vascular system, Phragmites australis floret 119
Vicia faba, functional anatomy of the ovule 80, 535

W

Water extraction, Gutierrezia sarothrae 144
Water relations: Andropogon gerardii 459; growing cells 10; rhizosphere 425; tallgrass prairie 432
Wood cell response to dehydration 90

Z

Zea mays, α-amylase isozyme profiles 395
